

A Futurist Scans the Horizons:

Curious about the future of insurance in the age of new technologies? Want to learn more about the use of drones, virtual reality, and the Internet of Things. What was recently viewed as a futuristic technology is now used by companies around the world. Kate Browne will discuss current and future applications, regulations, liability exposures, and the challenge of assessing the insurance risks associated with these emerging risks and will explain why insurance is not the next Uber.

Learning Objectives:

Drones:

- Current and future use of drone technology
- Insurance company and corporate use of drones
- Drone-related legal exposures

Virtual Reality:

- The potential benefits, current uses and risk of VR technology.

Internet of Things:

- How IoT is changing the risk landscape
- Insurers and corporate data sharing
- How IoT will impact the insurance industry
- How IoT will impact the role of the risk manager

The Future of Risk Managers, Brokers and Underwriters
