

## **Risks Ahead: The Changing Landscape of Global Medical and Security Threats**

### **Introduction – A look back at the last 20 years of travel risk mitigation**

How have risks evolved?

- Major incidents in low-risk destinations
- Increased travel to high-risk destinations

How have organisations evolved:

- Increased travel
- Greater emphasis on duty of care (legal cases to back this up)
- Greater expectations of employees to be safe-guarded
- Greater perception of risk
- Changing travelling population – older, more diverse

My recommendations of how to meet these challenges:

- Increased efficiency through triage of travel risk
- Training for travel managers
- Exercising
- Understand what tech and 3rd party providers can and cant do, and what you need to do for yourself
